VISIBLE SAFETY!

- **Visible safety**
  Never has a non-detachable tamper evidence been **so visible and intuitive**. A clear statement to consumers that brand owners highly value safety.

- **Convenient drinking**
  A comfortable drinking experience, thanks to the hinge technology which provides both a wide opening, and no spring-back effect.

- **Ease of closing & sound of safety**
  Specially designed to have an easy close, and audible “click” to assure consumers the lid is properly closed.

- **Convenient opening**
  Intuitive finger recess to open the closure from the front and from the side.

- **Clean & protected**
  The double wall lid technology protects the spout from external ingress (dust, insect…).

- **Tethered**
  The closure remains attached to the bottle, making it compliant with upcoming Single Use Plastic regulations in Europe.

- **Suitable for kids**
  Meeting kids toy norm (EN71 and BSDA).

- **Designed for filling line efficiency**

Born from consumer insight

DPS Lovenly - 16315e

Our technical team is at your service to audit and optimise your filling line.
