# The go-to drug delivery expert

## We thrive on bringing drug delivery solutions to market

When Pharmaceutical companies around the world want to develop safe, efficient and compliant medicines, they turn to Aptar Pharma, the go-to drug delivery expert, for proven drug delivery solutions and services.

## 'Delivering solutions, shaping the future' is in our DNA

Whether you need to deliver a game-changing molecule, a novel formulation, a repurposed generic, a brand extension or need lifecycle management support, we want to be your partner of choice.

## Together we can help deliver better patient outcomes

Our decades of device design, development and manufacturing expertise enables us to offer a broad range of innovative drug delivery solutions, while our portfolio of value-added services can help accelerate and derisk your drug product development process.

## We get products to market, supporting you throughout your development journey

Our proven track record of getting products to market has resulted in over 900 drug products being equipped with Aptar Pharma devices.

From our global locations, we support drug product development anywhere in the world, from the very beginning through the entire product lifecycle.

Accelerating and derisking development times and optimizing the drug/delivery interface, our experienced and expert teams provide tailored advice and support packages to guide you through the increasingly complex and constantly changing regulatory conditions, to help you from the bench to regulatory approval.

## We unlock value for our customers

We combine our experience with innovation to uncover the ideas you haven't yet imagined. Our creative approach to new product development uses the latest market trends, insights and analysis to identify opportunities and help deliver better patient outcomes. We are passionate about what we do, ensuring we deliver transformative solutions that can enable you to maximize your opportunity, safely and securely.

## Quality is built into everything we do

With 14 GMP sites around the world, our extensive manufacturing capacity and capabilities guarantee quality and security-of-supply wherever you are located.

Our capacity and quality is best expressed in numbers: 14 GMP sites, 120,000m<sup>2</sup> manufacturing space and 3,500 employees – manufacturing 8 billion systems per year, for over 1,500 customers.

## We deliver complete drug delivery solutions, more than just devices

From device and formulation development through the clinical trial phases, analytical testing, regulatory filings, and market launches, we add value at every stage of your drug development process, providing complete and proven solutions to your drug delivery challenge. We deliver you so much more than a device.

## A proven track record in supporting your drug development projects

The journey from device development through to commercialization requires proven experience and expertise, combined with scientific know-how, commitment, and passion. That's why we deploy the right team, including scientists, regulatory experts, manufacturing specialists and commercial champions, all aligned to your business needs and focused on your project's success. Because when you succeed, we succeed.

## Unparalleled expertise across the widest range of therapeutic areas

Aptar Pharma is the market leader in drug delivery devices for respiratory medicines and Allergic Rhinitis.

We offer decades of experience across the broadest range of therapeutic areas including Asthma and COPD, Dermatology, Eye Care, Allergic Rhinitis, Cough and Cold, Dermatology, Pain Management, and CNS treatments.

We are a respected thought leader in the drug delivery industry and are active in the scientific community.

## Innovative technologies to optimize your opportunities

We strongly believe in advancing our industry for the benefit of our partners, healthcare providers and of course, patients. With a mission to develop innovative new technologies for drug delivery, our R&D teams are working to deliver proprietary technologies that will support better user function, better drug delivery, and, ultimately, better patient outcomes, wherever they are in the world.

## We thrive on transforming ideas into opportunities

We combine experience and expertise with imagination and insights to deliver transformative solutions that enable you to improve patient outcomes and to maximize your commercial opportunities.

So whether you need to deliver a game-changing molecule, a novel formulation, a repurposed generic or a brand extension, we want to be your go-to drug delivery partner.
